- ✓ Versatility in application
- ✓ Consistency on all wood surfaces

WOCA WATER-BASED STAINS

Vibrant, consistent colors that soak deep into any wood surface: WOCA water-based stains together with the extensive color palette meet your need to stand out and create superior products.

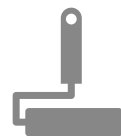

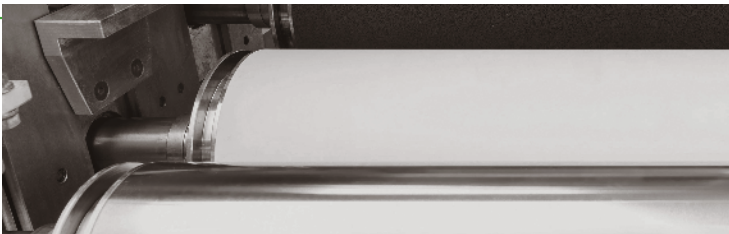

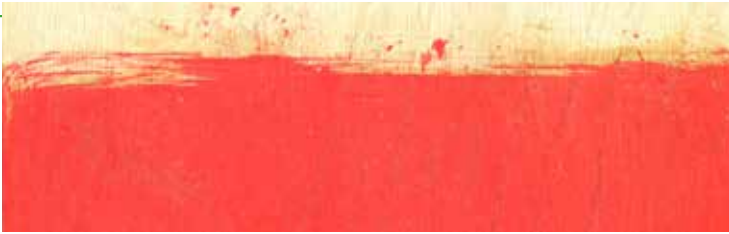

WOCA water-based stains are designed for pre-treatment of UV oils, oxidative oils, polyurethanes and other lacquers and sealers, thus reducing the required stock of stains. Flexible – and easily implemented into your manufacturing facility.

We consider the environment in every step we take, and conform to all relevant international standards.

Regardless of the application method, the WOCA system ensures high-performance results: Use on a roll coat equipment, spray it, or simply wipe by hand.

WOCA water-based stains are suitable for wood flooring, furniture, cabinetry, and other wood surfaces.

Made in Denmark

WOCA WATER-BASED STAINS: SIMPLE AND FLEXIBLE

Our premium selection of high-quality pigments makes it easy to match a desired color – the standard colors can be mixed or layered to create your own custom looks.
