

① PREPARE ② TREAT ③ MAINTAIN

INDUSTRIAL OXI QUICK SYSTEM

For creating ready-oiled LED-curing solutions

What is WOCA Industrial Oxi Quick System?

Oxi Quick is an oxidative oil based on natural and renewable oil components that protects and emphasizes the wood's natural look.

The product is green and sustainable, contains no acrylates or VOC and is cured using less energy than traditional UV products. It is environmentally responsible choice for both the factory and the consumer.

Oxi Quick offers exceptional clarity and protection from everyday spills and wear and tear. It is a great choice where excellent durability is a must, such as high traffic commercial installations.

The oil complies with Ö-Norm C 2380 - a certification that proves that the oil contains real vegetable oil components.

WOCA Industrial Oxi Quick System excels in creating ready-oiled solutions suitable for immediate stacking and packaging and is aimed at flooring manufactures with high demand flows.

The system is available as both LED- and UV-hardening curing systems.

Benefits gained with LED curing

- Less ventilation/cooling and heat generation are required
- Ozone free to protect the environment and the workers
- Significantly longer bulb life
- Contains no mercury
- Can be switched on and off instantly
- Consistent output

→ **Top quality**

Oxi Quick is developed, tested and manufactured in Denmark and is environmentally certified according to ISO 9001 and 14001 standards. Consistent level of high quality is assured.

→ **Sustainability**

Oxi Quick is a VOC-free oil with 100% solids that has low emissions and helps ensure a safe and good working environment during production.

→ **Efficient production**

Allows a very effective and high-speed production with line speeds of up to 20m per minute. Dries instantly with exposure to energy from an LED production drying oven.

→ **LED-curing**

LED lamps have significantly longer bulb lives and save energy, meaning less material costs, less production costs per m2 and quicker start-ups.

→ **Numerous colour options**

The transparent Oxi Quick is designed for use in conjunction with WOCA stains to create exciting colours that meet the homeowner's preferences.

→ **Natural oil look**

The wood is left with a pure oxidative oil look and feel. Absolutely no plastic-like surface like conventional UV oils tend to provide.

→ **Immediate stacking**

The productivity is increased, as the oiled wood planks can be stacked and packed immediately at the end of the line, creating a high-speed process.

→ **Ready-oiled solutions**

Pre-oiled wood flooring with extremely high durability and resistance are shipped and ready for fast and easy installing, also in high traffic commercial areas.

→ **After care**

WOCA supports the Oxi Quick with a standard array of care and maintenance products available on line or at retail select outlets to ensure the floor looks its best for years to come.

WOCA Denmark has been caring for floors, furniture and outdoor wood surfaces since 1969. We believe that all materials deserve to be cared for with quality products that keep them looking clean, healthy and beautiful for as long as possible.

Today, we are an international company - but our Danish roots can still be clearly seen in our high quality standards and our outlook. We take great care to limit our environmental impact and to live up to our customers' expectations when they use WOCA products to prepare, treat or maintain their materials.
